Honorable Board of Commissioners
Community Development Commission
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, CA 90012

Dear Supervisors and Commissioners:

**HEARING TO APPROVE THE SUBMISSION OF A SECTION 108 LOAN AND EDI
GRANT FOR THE LA ALAMEDA SHOPPING CENTER PROJECT (1)
(3 Vote)**

**IT IS RECOMMENDED THAT THE BOARD OF SUPERVISORS AFTER THE PUBLIC
HEARING:**

1. Approve the submission of an application for a Section 108 loan of approximately \$8,250,000 and an Economic Development Initiative (EDI) grant of approximately \$5,750,000 by the County of Los Angeles to the U.S. Department of Housing and Urban Development (HUD), which will enable the County to provide economic development gap financing for the La Alameda Shopping Center Project, a 233,000 square-foot retail shopping center and 14,000 square feet of office space in the buffer area of the federally-designated Empowerment Zone.
2. Authorize the Executive Director of the Community Development Commission, acting on behalf of the County, to submit the Section 108 loan and EDI grant application and to HUD, and to take any other HUD-required actions necessary to complete the application.

3. Authorize the Executive Director, acting on behalf of the County and following HUD approval of the application, to execute a Section 108 loan and EDI grant agreement with HUD, and all related documents, following approval as to form by County Counsel and to take all HUD-required actions to receive the grant and loan funds.

IT IS RECOMMENDED THAT THE BOARD OF COMMISSIONERS OF THE COMMUNITY DEVELOPMENT COMMISSION:

Authorize the Executive Director of the Community Development Commission, following approval by the U.S. Department of Housing and Urban Development (HUD), to receive from the County of Los Angeles a total of \$14,000,000 of federal assistance, comprised of approximately \$8,250,000 in Section 108 loan funds and approximately \$5,750,000 in Economic Development Initiative (EDI) grant funds, to provide economic development gap financing that will enable the development of the La Alameda Shopping Center Project, a 233,000 square-foot retail shopping center and 14,000 square feet of office space in the buffer area of the federally-designated Empowerment Zone.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION:

The proposed Section 108 loan and EDI grant funds will enable the Commission to provide economic development gap financing for the development of the La Alameda Shopping Center Project in the federally-designated Empowerment Zone.

FISCAL IMPACT/FINANCING:

There is no impact on the County General fund. Following approval by HUD, the Commission will incorporate a total of \$14,000,000 comprised of approximately \$8,250,000 Section 108 loan funds and approximately \$5,750,000 in EDI grant funds, through the annual budget process. The EDI regulations require that Section 108 loan proceeds be used in conjunction with the EDI grant.

Following approval by the Board of the application for the loan and for the related EDI grant funds, the Commission will return to the Board at a later date to request approval of the Section 108 loan and to enter into a Development Agreement for development of the La Alameda Shopping Center Project. The total amount of funds used will be \$14,000,000, however, the ratio of the Section 108 loan and EDI grant funds may change from the forecast amounts at the time the Development Agreement is executed, depending on the needs of the project.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS:

In 1995, the federal government, in conjunction with the County of Los Angeles and the City of Los Angeles, recognized the need and the opportunity for economic development in the poorest, low-income communities within Los Angeles County. A new Supplemental Empowerment Zone designation was, therefore, included in HUD's original Empowerment Zone and Enterprise Community programs. In June of 1995, the County accepted a \$25,000,000 EDI grant award and an associated \$25,000,000 award of Section 108 Guaranteed Loan Program authority. There remains \$17,500,000 of EDI grant funds and \$20,000,000 of related Section 108 Guaranteed Loan Fund authority available for eligible economic development activities.

Approval of this application by HUD will enable the County to receive a total of \$14,000,000 of federal assistance, to provide economic development gap financing that will enable the development of the La Alameda Project, a 233,000 square-foot retail shopping center and 14,000 square feet of office space in the buffer area of the Empowerment Zone. The Project will be developed on an 18.3-acre site located adjacent to the Alameda Corridor and Alameda Street, between Florence Boulevard and Leota Street in the unincorporated Florence Firestone area of the County.

Pursuant to 24 Code of Federal Regulations Section 570.704, Paragraph (a)(2)(iii), a public hearing must be held before submission of the application to HUD to obtain the views of citizens on community development and housing needs. Notice of the public comment period was published in a newspaper of general circulation 30 days prior to the public hearing. The public comment period concludes on December 14, 2004.

ENVIRONMENTAL DOCUMENTATION:

The submission to HUD of an Section 108 loan and EDI grant application is exempt from the provisions of the National Environmental Policy Act (NEPA), pursuant to 24 Code of Federal Regulations Part 58, Section 58.34 (a)(3) because it involves administrative activities that will not have a physical impact or result in any physical changes to the environment. The action is not subject to the provisions of the California Environmental Quality Act (CEQA) pursuant to State CEQA Guidelines 15061 (b)(3) because it is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Following HUD's approval on the requested funds, the Commission will return to the Board of Commissioners at a later date to request approval of the necessary environmental documentation.

IMPACT ON CURRENT PROJECTS:

The La Alameda Shopping Center Project will benefit low- and moderate-income residents of the County through the provision of goods and services otherwise not available in the Empowerment Zone.

Respectfully Submitted,

CARLOS JACKSON,
Executive Director

LOAN REQUEST

The County of Los Angeles, through the Community Development Commission of the County of Los Angeles (Commission), is requesting \$8,250,000 in Section 108 loan guarantee funds and \$5,750,000 in Economic Development Initiative (EDI) Grant funds from the U.S. Department of Housing and Urban Development (HUD) to provide GAP financing that will enable the development of a 233,000 square foot retail shopping center and 14,000 square feet of office space, in the buffer zone of the federally designated Empowerment Zone. The project is to be developed on an 18.3-acre site located adjacent to the Alameda Corridor and Alameda Street, between Florence Boulevard and Leona Street in the unincorporated Florence Firestone area of the County of Los Angeles.

The County will repay the \$8,250,000 loan over 20 years using sales and property tax proceeds generated by the shopping center project (see Exhibit D) Community Development Block Grant (CDBG) funds and other funds as may be designated by the County. The term of the loan is 20 years but the accumulation of projected surplus sales and property taxes will enable the early repayment or defeasance of the loan in year 13. (See Exhibit One, page 2 of Exhibit F).

The loan will be structured with both interim (variable rate) and permanent (fixed rate) notes. Housing and Urban Development (HUD) variable an interest rate is based on the 3-month LIBOR index plus 20 basis points. The interest rates on the permanent (fixed rate) are set at the time HUD holds a public offering of notes to private investors. The repayment estimates (See Exhibit F) are based on conservatively assumed interest rates that are 2% higher than those obtained by HUD in the June, 2004 note sale.

The loan will be matched by a grant of EDI funds in the amount of \$5,750,000. HUD provided these funds to be used in conjunction with Section 108 loans for the purposes of encouraging the economic development of the Empowerment Zone.

PROJECT BACKGROUND AND HISTORY

In 1995, the federal government, in conjunction with the County of Los Angeles and the City of Los Angeles, recognized the need and the opportunity for economic development in the low-income communities within Los Angeles County. A new Supplemental Empowerment Zone (SEZ) designation was included in HUD's original Empowerment Zone and Enterprise Community programs. In June of 1995, the County accepted a \$25,000,000 EDI grant award and an associated \$25,000,000 award of Section 108 Guaranteed Loan Program authority. A Comprehensive Agreement with the City of Los Angeles and the Los Angeles Community Development Bank (LACDB) was executed in June of 1995 to provide loans to businesses as a stimulus for the EZ area. In December of 2003, the County terminated the services of the Los Angeles Community Development Bank and requested the transfer of all funds and authority that had not been used by the LACDB to the County's own Economic Development Loan Fund (CEDLF). At this time there are \$17,500,000 of EDI grant funds and \$20,000,000 of related Section 108 Guaranteed Loan Fund authority available for eligible economic development activity in the EZ census tracts and buffer zone. HUD approved the transfer of funds to the County on May 18, 2004.

The proposed La Alameda Project site, located adjacent to the Alameda Corridor between Florence Avenue and Leona Streets, has been underutilized for many years since the closing of the Latchford Glass Company. Plagued with environmental concerns and lack of access to either Florence Avenue or Alameda Street, the site has significant barriers to develop.

For the last three years, Florence Alameda Associates LLC has been assembling land for the La Alameda Project. Primestor Development, Inc. proposes to build 233,000 square feet of retail space and 14,000 square feet of office space on a site that will be joined to Alameda Street by two large bridges over the Alameda Corridor, which is a 25 mile long, 55 ft. wide transportation corridor linking the Port of Los Angeles to the downtown industrial area.

Primestor Development Inc. submitted a proposal to the Commission for the development of the site in July 2003. The proposal identified a need for \$16,500,000 in grant assistance to fill the equity gap needed to make a project on the site economically feasible. The Commission engaged Keyser Marsten Associates, Inc, a nationally recognized real estate, redevelopment and economic development-consulting firm, to evaluate the financial feasibility of the Primestor Development proposal and to evaluate the economic gap identified by the Developer. The Commission also requested the National Development Council, to conduct a review of the project's eligibility and compliance of the project's economic gap analysis with HUD's guidelines and regulations regarding the appropriateness of the amount of assistance, and the adequacy of conditions precedent to and subsequent to the proposed grant.

Keyser Marston has estimated that the total development costs will be \$1.9 million lower than the costs projected by the Developer. They estimate a financial gap of \$11,000,000 is based on the Developer earning a return of 10.5% on this investment. The Developer has estimated the financial gap to be \$16,500,000 and has insisted on earning a return of 12% to justify the risks involved with the development of this project. To assist in the resolution of this difference the National Development Council has evaluated the project using HUD's guidelines for appropriateness of the amount of assistance and no undue enrichment; support a gap of \$14,000,000. We recommend that the gap to be financed shall not exceed \$14,000,000.

SOURCES AND USES OF FUNDS

The Sources and Uses of funds are extensively analyzed by the National Development Council (See Exhibit F) and by Keyser Marsten & Associates (See Exhibit G). The project development costs and sources of financing are estimated as follows:

<u>Uses</u>		<u>Sources</u>	
Land Acquisition	\$16,000,000	Takeout Loan	\$29,000,000
Direct Costs	\$26,000,000	Developer Equity	\$ 5,700,000
Indirect Costs	\$ 6,700,000	County Assistance	\$14,000,000
	\$48,700,000		\$48,700,000

KMA reviewed the Developer's pro forma and produced a report (Exhibit G) that compares the Developer assumptions and KMA analysis. KMA estimates that total project costs will be \$3,400,000 lower than those projected by the Developer. The difference between the KMA estimate and the Developer estimate results from KMA's \$1,400,000 lower On-site Cost estimate and the \$1,600,000 difference in private investment due to the vacancy allocation. We have accepted the KMA analysis as reasonable at \$48,700,000.

The Commissions recommendation for a \$14,000,000 grant is conditional on the actual level of project costs and makes provisions for the reduction of the HUD 108 loan based on the reductions, if any, in project costs. Additional conditions are included as a part of the Commissions recommendation based on the subsequent possible project refinancing or if the project's annual cash on cash return is greater than 15% to the initial ownership/development group. (See Exhibit F).

INSTITUTIONAL ARRANGEMENTS

Principal Developer:

Primestor Development Inc. and Primestor Construction Management, Inc. are recognized as among the nation's top 500 Hispanic owned businesses and was the recipient of the Latin Business Associations "Business of the Year" award in 2002. The firm was originally formed over 20 years ago in Los Angeles, California. They are involved in the development, management, acquisition and administration of over 1,000,000 square feet of commercial and residential property and they currently manage in excess of 400,000 square feet of their own assets. The President is Arturo Sneider of Los Angeles California.

Equity Source:

The developer's equity of \$5,700,000 is primarily composed of cash and the value of land acquired for the project. This is approximately 12% of the total project costs. The takeout loan for the project is estimated to be \$29,000,000. The total costs of the project are estimated by KMA at \$48,700,000. Additional equity in the amount of \$14,000,000 will be required to bridge the gap between the total project costs, and the developer's equity and take out financing. KMA has analyzed the financing gap based on Return on Investment assumptions. Their estimated gap ranges from a low of \$11,600,000 to a high of \$15,000,000. The National Development Council has analyzed the GAP from the perspective of HUD program requirements and has concluded that \$14,000,000 is reasonable given certain conditions precedent to the award of the grant and conditions precedent to the final disbursement of the funds.

Developer's Permanent Loan

The analysis by KMA and the National Development Council presume that the Developer will take out a \$29,000,000 loan with a projected interest rate of 7 %. Based on letters of intent from class A tenants, it is reasonable to expect that the Developer will obtain this level of financing. Changes in the amount of the permanent loan can affect the analysis of reasonable private return.

This is discussed in the appropriate review by the National Development Council (Exhibit F) and it will be governed by the Conditions Subsequent identified in that analysis.

Ownership upon Completion

Florence Alameda Associates, LLC, will own the La Alameda project upon completion. Florence Alameda Associates is owned 50% by Arturo Sneider and 50% by John Selby, the principals of Primestor Inc. LARD LP is owned by Lorenzo Flores and related parties. Together they represent a capable ownership group that can be expected to perform as planned.

Borrower and Repayment Source for Section 108 loan

The County of Los Angeles is the borrower for the HUD Guaranteed Section 108 loan Funds and will enter into a Contract for Loan Guarantee Assistance with HUD. The County will execute the Promissory Note and execute all related loan documents in a form acceptable to HUD. The County will repay the Section 108 loan using Community Development Block Grant funds as stipulated in the above agreements, project generated sales and property taxes and other funds that may be designated by the County. The Commission, acting on behalf of the County of Los Angeles will administer the Section 108 loan including the draw down and disbursement of the Section 108 loan funds and the related EDI grant funds.

REPAYMENT SCHEDULE

The Amortization Schedule for the proposed Section 108 loan is contained in Exhibit C. The Schedule begins with an opening Loan Balance of \$8,250,000. The loan term of the loan is 20 years. The projected interest rates are conservatively based on the most recent HUD offering of notes plus 2%; and begin at 4.3% for year one and end with 8% in year 20.

The related EDI grant in the amount of \$5,750,000 will be drawn concurrently with the \$8,250,000 of Section 108 funds.

The County recommends the division of the annual loan payment equally between CDBG funds allocated to the 1st Supervisorial District and the project-generated sales and property taxes. The payment calculation is shown on Page 2 to Exhibit C. The County further recommends the commitment of all of the project generated sales tax and property tax revenues to the early defeasance of the loan. Surplus funds will be held in a separate account, by the Collateral Agent for the County's Section 108 loan programs, as additional security to the loan. If the project performs as projected, there will be sufficient funds in the account to defease the loan beginning in year 13.

COLLATERAL

As required by HUD, the County must provide collateral in the amount of the loan, in the event the repayments funds are not available the County will pledge the project generated Sales tax and property tax proceeds and other such funds, as the County may desire to secure the loan.

To assure the completion of a successful project that provides the expected public benefits the Commission shall enter into a development Agreement with Primestor Inc. This agreement shall contain at a minimum all of the conditions precedent and conditions subsequent to disbursement as are contained in the Appropriate Review (See Exhibit F).

TIME TABLE AND STAGES

The following phases of development are subject to revision pending negotiation of the Development Agreement:

Pre Development: Pre-development work shall be completed by January of 2005.

Construction: Construction shall commence in January 2005 and be complete by March 2006.

Permanent Financing: Permanent Financing through a Commercial lender acceptable to the LACDC shall be committed and funded by March 2006. County funding will be committed as indicated in the Development Agreement.

ELIGIBLE ACTIVITY

Citizen Participation: On December 16, 2003 the County Board of Supervisors approved the Transition Plan Update for the Los Angeles Community Development Bank. This completed a substantive citizen participation process related to the closing of the Los Angeles Community Development Bank and to the transfer of remaining grant funds and related Section 108 loan guarantees to the County for use in the County Economic Development Loan Fund. In addition to the LACDB related citizen participation process, the Commission made 6 presentations to the Empowerment Zone Oversight Committee through the calendar year 2003 and 2 additional presentations at Consolidated Plan Community meetings held in or near Empowerment Zone areas. The La Alameda project was among the projects discussed at these meetings.

Prior to submission of this application to HUD, a notice will be published to notify residents of a public hearing on this project before the Los Angeles County Board of Supervisors.

Eligibility

The activities that may be funded for this project are site acquisition under Section 570.703(a) and economic development activities under Section 570.703(i)(1).

NATIONAL OBJECTIVE

The project meets the CDBG national objective of Activities Benefiting low and moderate-income persons under Section 570.208(a)(1)(i), which requires the project to be located within census tracts that contain at least 51% low and moderate-income persons. The five-mile service

area (Exhibit B) of the project contains 305,670 persons, of which 214,243 (70%) are low and moderate-income persons according to the 2000 Census.

PUBLIC BENEFIT STANDARDS

Pursuant to Section 570.209, a project must provide a minimum amount of public benefit if funding activities under 570.703(i). The La Alameda Shopping Center project is a shopping center that will provide goods and services to residents within a five-mile service area, which is benefit listed under Section 570.209. Specifically, the level of benefit for the provision of goods and services should be no more than \$350 of assistance per one low and moderate-income person in the service area. This project meets this criteria as it provides \$65.34 of assistance per low- and moderate-income person. This figure is calculated as follows:

- $\$14,000,000 \text{ Section 108 and EDI assistance} \div 214,243 \text{ low/mod. persons in service area} = \$65.34 \text{ per low/mod. person.}$

As an additional benefit, this project will create an estimated 750 permanent, full-time equivalent jobs. These jobs will be available to low and moderate income person as well as residents in the census tracts.

LOS ANGELES COUNTY COMMUNITY DEVELOPMENT COMMISSION
 APPROPRIATE REVIEW FOR PRIMESTOR DEVELOPMENT, INC.
 (DEVELOPER), FLORENCE ALAMEDA ASSOCIATES, LL. (DIRECT OWNERSHIP
 ENTITY) FOR LA ALAMEDA SHOPPING CENTER PROJECT
 \$14,000,000
 DEVELOPMENT SUBSIDY GRANT

DRAFT

FUNDED BY HUD-108 LOAN AND EDI GRANT

HUD Loan: \$8,250,000 @ 4.3-8.0% for 20 years. Annual repayment averaging \$698,461 per year. See Exhibit One attached.

HUD EDI Grant: \$5,750,000 Loan to grant leverage 1.4 to 1.0.

Sources for HUD
Annual Loan
Repayment:

- 1) Site specific pledge of La Alameda sales tax. This source is expected to average \$693,500 per year.
- 2) Site specific pledge of La Alameda net property tax increment. This source is expected to average \$59,500 per year.
- 3) Pledge of Los Angeles County Community Development Block Grant. This source is expected to average \$417,863 per year. Projected cumulative excess sales and property tax permit early repayment of the HUD-108 loan in year 15.

Security for
Loan from HUD:

- 1) Unrestricted pledge of the Los Angeles County Community Development Commission Community Development Block Grant.
- 2) Los Angeles County site specific pledge of project tax increment.
- 3) Los Angeles County site specific pledge of sales tax.
- 4) A County pledge of such other funds as are required to fully repay the HUD-108 loan.

Conditions Precedent
to Grant Disbursement:

- 1) Executed credit leases for 65% of the gross leaseable space in the project on terms acceptable to the County in its sole discretion.
- 2) A closed construction loan and a legally binding term financing commitment in amounts and terms acceptable to the County in its sole discretion.
- 3) Legally binding guaranteed maximum fixed price contract(s) covering all direct construction costs acceptable to the County in its sole discretion.
- 4) Developer Guaranty of Completion of Construction and Leasing to 65% occupancy secured by collateral acceptable to the County in its sole discretion.
- 5) Completion of all entitlements acceptable to the County in its sole discretion.
- 6) Completion of working drawings acceptable to the County in its sole discretion.

Conditions Subsequent: 1) In the event that budgeted project costs below are not incurred, then the HUD-108 loan must be reduced seventy-five cents for every dollar saved.

- 2) In the event the project is sold during the first seven years after the issuance of the final certificate of occupancy for the project, 50% of all net sale proceeds above the project's total costs after deducting costs financed by the HUD Grant, and, allowing the developer a 15% profit on the net private costs, shall be repaid to the County to reduce the County subsidy. For example, a sale at \$42.0 million produces a County repayment of \$1.05 million as follows:

Total Project Costs	\$48.7 million
Less: HUD Grant	14.0 million
Net Private Costs	34.7 million
Developer Profit 15%	5.2 million
Private Costs and Profit	39.9 million
Net Sale Price	42.0 million
Less: Private Costs and Profit	<u>39.9 million</u>
Tier II Profit	2.1 million
Developer Share	1.05 million
County Subsidy Repayment Share	1.05 million

- 3) In the event of project refinancing by the initial ownership/development group prior to the end of the seventh year after issuance of the final certificate of occupancy for the project, 50% of all net refinance proceeds greater than the project's Net Private Costs shall be repaid to the county to reduce the County subsidy. For example, a refinancing at \$36.0 million produces a County repayment of \$.65 million, as follows:

Total Project Costs	\$48.7 million
Less: HUD Grant	14.0 million
Net Private Costs	34.7 million
Gross Refinance Proceeds	36.0 million
Less: Net Private Costs	<u>34.7 million</u>
Net Refinance Proceeds	1.3 million
Developer Share	.65 million
County Subsidy Repayment Share	.65 million

- 4) In the event the project's annual cash on cash return is greater than 15% to the initial ownership/development group for any year prior to the end of the seventh year after the issuance of the final certificate of occupancy for the project, 50% of the cash flow greater than the 15% cash on cash private return shall be repaid to the County to reduce the County subsidy. For example, a cash flow of \$1.6 million and a cash investment of \$5.7 million produces a current year County cash flow subsidy repayment of \$373,000 as follows:

Current Year Average Cash Investment	\$5.7 million
15% Private Return	.855 million
Current Year Project Cash Flow	\$1.600 million
Less: 15% Private Return	.855 million
Surplus Cash Flow	.745 million
Developer Share	.373 million
County Subsidy Repayment Share	.373 million

Background:

For the last three years Florence Alameda Associates, LLC has been assembling land for the La Alameda project. Primestor Development, Inc. (Developer) proposes to construct 233,000 square feet of retail space and 14,000 square feet of office space on an 18.3-acre site located adjacent to Alameda Street between Florence Avenue and Leota Street (Site). Please see the site plan attached as Exhibit Three. Letters of intent from prospective tenants have been received from Ross and Marshall's. Active negotiations are being carried on with Linens N' Things, Office Depot, Childrens Place, Anchor Blue, Old Navy, Party City, Shoe Pavillion and Miry.

Public Benefit:

The project is a value power center which will provide goods and services to residents within a 5 mile service area. Within this service area are 305,670 persons, 214,243 of whom are persons in poverty according to 2000 census statistics. Using \$14,000,000 of 108 Loan and EDI Grant divided by 214,243 persons in poverty produces a ratio of one person in poverty to every \$65.35 of 108 and EDI funds. This is well within the aggregate standard of at least one low- and moderate-income person per \$350 of 108/EDI/CDBG funds. See Section 570.209(b)(1)(ii). Service area statistics by census tract are provided in Exhibit Four.

Uses and Sources
For Project Costs:

The project development costs and sources of financing are estimated as follows:

(Amounts in Millions)			
<u>Uses</u>		<u>Sources</u>	
Land Acquisition ¹	\$16.0	Takeout Loan	\$29.0
Direct Costs ¹	26.0	Equity	5.7
Indirect Costs ¹	6.7	HUD Grant	14.0
	<u>\$48.7</u>		<u>\$48.7</u>

¹See Exhibit Five, Keyser Marston report dated 7/6/04.

Reasonable Costs:

Project costs of \$48.7 million have been carefully reviewed by Keyser Marston Associates, Inc. (KMA). See Exhibit Five.

KMA differs with the developer in the amount of \$1,900,000. Given the \$5.4 million cost increase since July 1, 2003, it is difficult to say the developer's higher figure is reasonable. We accept the KMA analysis as reasonable at \$48.7 million.

Need for Subsidy:

KMA has also analyzed the financing gap based on alternate return on investment (ROI) assumptions. The estimated gap ranges from a low of \$11.6 million to a high of \$15.0 million. The \$14.0 million initial gap funding amount is reasonable until final project costs are realized and leases executed.

DRAFT

Commitment of
Financing:

At this time, the developer has not received a formal financing commitment. However, the strong letter of intent interest by prospective tenants should lead to expeditious financing.

HUD Funds Not
A Substitute For
Private Financing:

HUD funds are being made available to a private project to fill an ROI gap (Exhibit Five). But for the County grant, this project would otherwise not be built. Please see developer's but for letter in Exhibit Six.

Reasonable
Private Returns:

The KMA project pro forma analysis dated 7/6/04 reflects an NOI of \$3,903,000. With a \$29.0 million permanent loan @ 7%, annual debt service is \$2,315,253, this gives the project a 1.69 debt coverage ratio. With cash flow of \$1,587.74? and a cash investment of \$5.7 million, the cash on cash rate of return is 27.9%. However, condition subsequent 4) above prevents this cash flow return from being unreasonable. Likewise, condition subsequent 1) cost savings, 2) excess sale proceeds, and 3) excess refinance proceeds are also designed to ensure that the private returns are reasonable.

Project Feasibility:

Florence Alameda Associates LLC is owned 50% by Florence Roseberry LLC and 50% by LARD L P. Florence Roseberry is owned 50% by Arturo Sneider and 50% by John Selby (the Primestor principals). LARD is owned by Lorenzo Flores and related parties. We have reviewed financial information on Sneider, Selby and Flores. In combination, they have substantial cash (mid-seven figures), net worth (mid-eight figures) and other projects under development (Primestor has 12 active projects). They represent a capable ownership group that can be expected to perform on plan. Combined with a strong pre-leasing effort, this should be a successful project.

Recommendation:

We recommend this project be approved and submitted to HUD for funding.

THE NATIONAL DEVELOPMENT COUNCIL

MEMORANDUM

To: Manuel G. Acosta, Development Specialist
Economic/Redevelopment Division
Los Angeles County
Community Development Commission

From: Cal Hollis
Ava H. Lee

Date: July 6, 2004

Subject: La Alameda Financial Feasibility

At your request, Keyser Marston Associates, Inc. (KMA) has evaluated the financial feasibility of the Primestor Development, Inc. (Developer) proposal dated June 10, 2004. The Developer proposes to construct approximately 233,000 square feet of retail space and 14,000 square feet of office space (Project) on an 18.3-acre site located adjacent to Alameda Street between Florence Avenue and Leota Street (Site). Specifically, the Developer is requesting \$15.0 million in assistance. The objective of the KMA analysis is to determine the required assistance warranted by the Project.

BACKGROUND

KMA previously evaluated the Developer proposal dated July 1, 2003. The 2003 proposal suggested a similar development scope at a cost of \$44.8 million and requested \$16.5 million in assistance. The table below illustrates the Developer and KMA estimated financial gaps presented in a KMA memorandum dated September 26, 2003.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission

Subject: La Alameda Financial Feasibility

July 6, 2004
Page 2

	<u>Developer</u>	<u>KMA</u>
Site Assemblage	\$12.9 million	\$12.9 million
Direct	25.5 million	24.2 million
Indirect	5.0 million	4.5 million
Financing	<u>1.4 million</u>	<u>1.7 million</u>
Development Cost	\$44.8 million	\$43.3 million
Net Operating Income	\$3.4 million	\$3.4 million
Required Return	12.0%	10.5%
Financial Gap	\$16.5 million	\$11.0 million

The Developer has since updated development cost and income estimates and is requesting assistance of \$15.0 million.

ORGANIZATION

KMA reviewed the Developer's current pro forma and reorganized it into our format to allow a substantive comparison of the Developer's assumptions and KMA's independent analysis of the Project. The proposed Developer and KMA pro formas are shown in Tables 1-3. A summary table is presented in Table 4.

ESTIMATED DEVELOPMENT COST

Site Assemblage

The Developer estimates \$16.0 million in site assemblage costs. This estimate is \$3.1 million higher than the previous estimate of \$12.9 million which consists of actual cost of properties owned by the Developer as well as estimates of pending acquisitions. KMA recommends Los Angeles County Community Development Commission (LACDC) to verify the reasonableness of the increase.

Direct Costs

Typical direct costs include demolition, off-site, on-site, building shell, tenant improvement, and parking costs. The estimates made by KMA are based on our experience with similar projects in the region.

- A \$1.0 million allowance is provided for demolition costs.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission
Subject: La Alameda Financial Feasibility

July 6, 2004
Page 3

- The Developer has assumed a \$2.0 million allowance for the construction of a new bridge between Alameda Street and the Site. This is twice the cost of the previous estimate. KMA has assumed the new estimate.
- The Developer estimates on-site improvements to be \$4.6 million. KMA estimates on-site costs to be \$3.2 million or \$4.00 per square foot of land area. These estimates include landscaping and signage.
- Building costs vary based on the intended use. Building shell costs range between \$55.00 and \$85.00 per square foot. Total shell costs as estimated by the Developer is \$14.6 million.
- The Developer estimates \$3.5 million in tenant improvements.
- The proposed office component includes an additional parking garage. The Developer estimates \$8,000 per parking space. KMA has assumed this estimate.
- Hard cost contingencies are estimated to be \$1.2 million.

Total direct costs as estimated by the Developer is \$27.4 million. KMA estimates the direct costs to be \$26.0 million.

Indirect Costs

Indirect costs are typically estimated as a percentage of direct costs. KMA has highlighted a number of the Developer and KMA assumed indirect costs below:

- The architecture, engineering, and professional costs are estimated to be \$1.2 million by the Developer and \$1.3 million by KMA.
- The Developer indicates permits and fees to be \$2.93 per square foot for approximately 247,000 square feet of building space. KMA recommends LACDC to verify this estimate.
- KMA allocates 2.0% of direct costs, or \$521,000 for taxes, insurance, legal, and accounting. The Developer estimates 1.8% of direct costs, or \$500,000.
- The Developer estimates leasing commissions to be \$1.6 million. KMA estimates leasing commissions for small retail tenants to be no greater than \$8.00 per square foot of building. KMA estimates leasing commissions to be \$1.3 million.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission
Subject: La Alameda Financial Feasibility

July 6, 2004
Page 4

- Development management fee is estimated by the Developer at 5.3% of direct costs (\$1.5 million). KMA allows for 3.0% of direct costs (\$781,000).
- The indirect contingency is estimated at 3.8% of other indirect costs (\$206,000). KMA allows for 5.0% (\$232,000).

The Developer estimates indirect costs to be \$5.7 million. This estimate is \$828,000 higher than the KMA estimate of \$4.9 million.

Financing Costs

The Developer estimates construction period interest and fees for the Project to be \$1.5 million. To estimate financing costs, KMA assumes an 18-month construction period, 65% average outstanding balance, and 7.0% interest rate for the construction loan, 75% loan to cost and 1.0 point for loan origination fees. KMA estimates \$1.8 million in financing costs.

Overall, the Developer's estimated costs for the Project is \$50.6 million (\$205 per square foot of building area). KMA estimates development cost to be \$48.7 million (\$198 per square foot of building area). The current Developer development estimates are approximately \$6 million more than the 2003 estimates. The primary differences can be attributed to the \$3.1 million increase in land cost and \$1.0 million increase in off-site cost. *.8 soft*

ESTIMATED NET OPERATING INCOME (NOI)

Based on the Developer's projections, the annual rents are estimated to range from \$11.00 to \$22.00 per square foot for anchor and sub-anchor space. The shops and pads can expect \$24.00 to \$45.00 per square foot of building. The total annual rent is estimated at \$4.3 million, an increase of \$342,000 from the 2003 proposal. The Developer assumes a 5.0% vacancy factor on the entire project, 5.6% of effective gross income (EGI) for operating expenses, \$1.3 million in reimbursed maintenance expenses, and \$48,000 for groundlease of a corner parcel. The NOI for the Project as estimated by the Developer is \$3.7 million. KMA applied a 5.0% vacancy factor to the non-major tenants only and allocated 5.0% of EGI for operating expenses. KMA estimates the NOI to be \$3.9 million.

The above estimated NOI's represent an increase of \$303,000 (Developer) and \$505,000 (KMA) from the 2003 proposal.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission
Subject: La Alameda Financial Feasibility

July 6, 2004
Page 5

ESTIMATED FEASIBILITY GAP

The Developer requests a return on investment (ROI) of 10.4%, thus supporting a \$35.6 million investment. Deducting for development cost of \$50.6 million results in a gap of \$15.0 million. Based on KMA experience, a reasonable ROI for this type of project is 10.5%. At 10.5%, this project can support a \$37.2 million investment. Deducting for development cost of \$48.7 million results in a gap of \$11.6 million.

Primary contributing factors to the \$3.4 million difference between the Developer and KMA analysis are:

- On-site cost estimate, responsible for \$1.4 million of the difference; and
- Vacancy allocation, responsible for \$1.6 million of the difference in private investment.

We hope this analysis is helpful and are available to discuss the above at your convenience.

MEMORANDUM

To: Manuel G. Acosta, Development Specialist
 Economic/Redevelopment Division
 Los Angeles County
 Community Development Commission

From: Cal Hollis
 Ava H. Lee

Date: July 6, 2004

Subject: La Alameda Financial Feasibility

At your request, Keyser Marston Associates, Inc. (KMA) has evaluated the financial feasibility of the Primestor Development, Inc. (Developer) proposal dated June 10, 2004. The Developer proposes to construct approximately 233,000 square feet of retail space and 14,000 square feet of office space (Project) on an 18.3-acre site located adjacent to Alameda Street between Florence Avenue and Leota Street (Site). Specifically, the Developer is requesting \$15.0 million in assistance. The objective of the KMA analysis is to determine the required assistance warranted by the Project.

BACKGROUND

KMA previously evaluated the Developer proposal dated July 1, 2003. The 2003 proposal suggested a similar development scope at a cost of \$44.8 million and requested \$16.5 million in assistance. The table below illustrates the Developer and KMA estimated financial gaps presented in a KMA memorandum dated September 26, 2003.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission

Subject: La Alameda Financial Feasibility

July 6, 2004
Page 2

	<u>Developer</u>	<u>KMA</u>
Site Assemblage	\$12.9 million	\$12.9 million
Direct	25.5 million	24.2 million
Indirect	5.0 million	4.5 million
Financing	<u>1.4 million</u>	<u>1.7 million</u>
Development Cost	\$44.8 million	\$43.3 million
Net Operating Income	\$3.4 million	\$3.4 million
Required Return	12.0%	10.5%
Financial Gap	\$16.5 million	\$11.0 million

The Developer has since updated development cost and income estimates and is requesting assistance of \$15.0 million.

ORGANIZATION

KMA reviewed the Developer's current pro forma and reorganized it into our format to allow a substantive comparison of the Developer's assumptions and KMA's independent analysis of the Project. The proposed Developer and KMA pro formas are shown in Tables 1-3. A summary table is presented in Table 4.

ESTIMATED DEVELOPMENT COST

Site Assemblage

The Developer estimates \$16.0 million in site assemblage costs. This estimate is \$3.1 million higher than the previous estimate of \$12.9 million which consists of actual cost of properties owned by the Developer as well as estimates of pending acquisitions. KMA recommends Los Angeles County Community Development Commission (LACDC) to verify the reasonableness of the increase.

Direct Costs

Typical direct costs include demolition, off-site, on-site, building shell, tenant improvement, and parking costs. The estimates made by KMA are based on our experience with similar projects in the region.

- A \$1.0 million allowance is provided for demolition costs.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission
Subject: La Alameda Financial Feasibility

July 6, 2004
Page 3

- The Developer has assumed a \$2.0 million allowance for the construction of a new bridge between Alameda Street and the Site. This is twice the cost of the previous estimate. KMA has assumed the new estimate.
- The Developer estimates on-site improvements to be \$4.6 million. KMA estimates on-site costs to be \$3.2 million or \$4.00 per square foot of land area. These estimates include landscaping and signage.
- Building costs vary based on the intended use. Building shell costs range between \$55.00 and \$85.00 per square foot. Total shell costs as estimated by the Developer is \$14.6 million.
- The Developer estimates \$3.5 million in tenant improvements.
- The proposed office component includes an additional parking garage. The Developer estimates \$8,000 per parking space. KMA has assumed this estimate.
- Hard cost contingencies are estimated to be \$1.2 million.

Total direct costs as estimated by the Developer is \$27.4 million. KMA estimates the direct costs to be \$26.0 million.

Indirect Costs

Indirect costs are typically estimated as a percentage of direct costs. KMA has highlighted a number of the Developer and KMA assumed indirect costs below:

- The architecture, engineering, and professional costs are estimated to be \$1.2 million by the Developer and \$1.3 million by KMA.
- The Developer indicates permits and fees to be \$2.93 per square foot for approximately 247,000 square feet of building space. KMA recommends LACDC to verify this estimate.
- KMA allocates 2.0% of direct costs, or \$521,000 for taxes, insurance, legal, and accounting. The Developer estimates 1.8% of direct costs, or \$500,000.
- The Developer estimates leasing commissions to be \$1.6 million. KMA estimates leasing commissions for small retail tenants to be no greater than \$8.00 per square foot of building. KMA estimates leasing commissions to be \$1.3 million.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission

Subject: La Alameda Financial Feasibility

July 6, 2004
Page 4

- Development management fee is estimated by the Developer at 5.3% of direct costs (\$1.5 million). KMA allows for 3.0% of direct costs (\$781,000).
- The indirect contingency is estimated at 3.8% of other indirect costs (\$206,000). KMA allows for 5.0% (\$232,000).

The Developer estimates indirect costs to be \$5.7 million. This estimate is \$828,000 higher than the KMA estimate of \$4.9 million.

Financing Costs

The Developer estimates construction period interest and fees for the Project to be \$1.5 million. To estimate financing costs, KMA assumes an 18-month construction period, 65% average outstanding balance, and 7.0% interest rate for the construction loan, 75% loan to cost and 1.0 point for loan origination fees. KMA estimates \$1.8 million in financing costs.

Overall, the Developer's estimated costs for the Project is \$50.6 million (\$205 per square foot of building area). KMA estimates development cost to be \$48.7 million (\$198 per square foot of building area). The current Developer development estimates are approximately \$6 million more than the 2003 estimates. The primary differences can be attributed to the \$3.1 million increase in land cost and \$1.0 million increase in off-site cost.

ESTIMATED NET OPERATING INCOME (NOI)

Based on the Developer's projections, the annual rents are estimated to range from \$11.00 to \$22.00 per square foot for anchor and sub-anchor space. The shops and pads can expect \$24.00 to \$45.00 per square foot of building. The total annual rent is estimated at \$4.3 million, an increase of \$342,000 from the 2003 proposal. The Developer assumes a 5.0% vacancy factor on the entire project, 5.6% of effective gross income (EGI) for operating expenses, \$1.3 million in reimbursed maintenance expenses, and \$48,000 for groundlease of a corner parcel. The NOI for the Project as estimated by the Developer is \$3.7 million. KMA applied a 5.0% vacancy factor to the non-major tenants only and allocated 5.0% of EGI for operating expenses. KMA estimates the NOI to be \$3.9 million.

The above estimated NOI's represent an increase of \$303,000 (Developer) and \$505,000 (KMA) from the 2003 proposal.

To: Manuel G. Acosta, Los Angeles County
Community Development Commission
Subject: La Alameda Financial Feasibility

July 6, 2004
Page 5

ESTIMATED FEASIBILITY GAP

The Developer requests a return on investment (ROI) of 10.4%, thus supporting a \$35.6 million investment. Deducting for development cost of \$50.6 million results in a gap of \$15.0 million. Based on KMA experience, a reasonable ROI for this type of project is 10.5%. At 10.5%, this project can support a \$37.2 million investment. Deducting for development cost of \$48.7 million results in a gap of \$11.6 million.

Primary contributing factors to the \$3.4 million difference between the Developer and KMA analysis are:

- On-site cost estimate, responsible for \$1.4 million of the difference; and
- Vacancy allocation, responsible for \$1.6 million of the difference in private investment.

We hope this analysis is helpful and are available to discuss the above at your convenience.
